DRIVING STANDARDS

Upon Entering the competition, a Competitor agrees with all relevant Regulations concerning the Competition.

1 Vehicle Assistance

It is not allowed to push the vehicle of another competitor to assist them in case of running out of fuel, experienced a mechanical breakdown etc.

2 Technical Problems

If there is a technical problem on the driver side simulators, like hardware failure and stuff. There will be no restart of the session.

3 Solo Driving

Competitors must drive the car alone and unaided.

4 Regulation Compliance

Competitors must always follow all aspects of these Sporting Regulations, as well as any other Regulatory documents deemed to cover the event in question, both on and off track.

5 Track Usage

Competitors must use the track at all times. For the avoidance of doubt, the track-limits as enforced by the software will be the definitions of being on or off the circuit.

Competitors may not utilise walls or other objects to gain an advantage in getting around a corner ("wall-riding"). Competitors deemed to have used walls in an advantageous way may be subject to a penalty.

Should a car leave the track for any reason, the Competitor may re-join. However, this may only be done when it is safe to do so and without gaining any advantage.

At the absolute discretion of the Race Director, a Competitor may be given the opportunity to give back the whole of any advantage gained by leaving the track.

TERMS OF ENGAGEMENT ON THE TRACK

On-Track Etiquette

Important Basics

First of all, make sure that you are always in control of your car. This is the most important rule. Inability to control your car is not an excuse if you cause an accident.

This is car racing, so slight contact is to be expected and will be tolerated. Bashing your way through the field however will most certainly not be tolerated. Remember at all times that you are driving with other humans. So stay humble, and race with respect.

Start Phase

STANDING START on both platforms Assetto Corsa and iRacing on all classes. It is very easy to cause an accident affecting many cars. Start phase accidents will be penalized more harshly especially on Turn 1.

Overtaking

Overtaking is one of the most crucial parts of racing. All drivers involved in an overtaking move must show respect and drive with care. Do not force a chasing car off the track by leaving too little room.

Do not change your late change line under braking. If the attacking car is alongside going into a corner, drivers must adjust their line to avoid contact. Blocking a car that has an overlap is not allowed. An overlap is defined that the front of the attacker's car is at least next to the rear tyres of the defender's car. Excessive divebombing is also not allowed.

Track Boundaries

The track boundaries are whatever is defined as legal by the automated cut-track detection of Exceeding the track boundaries is not allowed and will be penalized. This is especially the case if you gain a time advantage, overtake or defend your position while exceeding the track boundaries.

We will use system track limits cut detection. Also, it should be witnessed by the stewards that drivers are taking advantage of it. This decision then will not be reversed.
